

# INTEGRITY AUTOMOTIVE

## Did You Know...

Integrity Automotive is your local neighborhood full service and repair facility. We are the ONE STOP SHOP Car Care Center for all your needs bumper-to-bumper. There is no need to go to a "Specialty" shop for this or that, we DO it ALL! Tires, Alignments, Brakes, Electrical, Emissions, Air Conditioning, Oil Change Services and so much more...

Our special this month is all about saving Fuel! A malfunctioning or missing gas cap can cause your gasoline to vaporize and cost you money. Tire Pressure is very important, especially when the weather turns warm, then cold, cold then warm this can cause under-inflated tires and can cost you 2 miles per gallon. Worn Spark Plugs can cause misfiring, which can waste fuel. Dirty Air Filter can become clogged and affect your mileage by 2 miles per gallon.

Please stop by anytime and we will check your tire pressure for you... if you are not sure

Extra fuel saving tips: Worn O2 Sensor can affect your gas mileage by 3 miles per gallon, Dirty Engine Oil 1 mile per gallon, Dirty Fuel Filter 1.5 miles per gallon, driving over 70 miles per hour can cost you 10 cents or more a gallon and for ever 100 lbs you over load your truck can reduce your gas mileage by 1-2%.

Tips: use cruise control when traveling high speeds for long period of times and clear the back of your truck or trunk of your vehicle with unneeded items.

Do you drive on dirt roads? This will affect the Air Filter and require replacement more often. Rough roads can cause your car to be out of alignment and may shorten the life time of your tires. Driving daily on rough roads can cause many different issues with your vehicle over time.

With heavy rains bring Potholes! This can cause suspension and tire issues depending on the depth and speed your vehicle goes into a Pothole. Are you driving down the road and the steering wheel is shaking in your hand? Do you let go of your steering wheel and it turns left or right? Your vehicle may be out of alignment. A vehicle out of alignment can affect your gas mileage by 1.5 miles per gallon.

Integrity Automotive is the Next Generation of Automotive Services.
